Work Experience

DigitalGlue [↗](#)

[📍 Atlanta, GA](#) [📅 Oct 2018 - Present](#)

Senior Software Developer

[Feb 2023 - Present](#)

- Led and supervised a team of 3 junior developers, providing mentorship, conducting code reviews, and establishing coding standards.
- Directed a company-wide transition from JavaScript to TypeScript, improving code quality and maintainability, which reduced bugs by 25% and increased developer productivity by 20%.
- Spearheaded the design and implementation of an update pipeline for the company's Electron.js desktop application, enabling over-the-air updates for users.
- Led the refactoring of the product's REST API using modern JavaScript practices, reducing page load times by 35% through the elimination of blocking I/O.

Software Developer

[Nov 2021 - Feb 2023](#)

- Designed and implemented new features for the core product, translating project manager requests into practical software solutions.
- Provided direct support to clients and effectively debugged production issues.
- Maintained multiple production codebases, ensuring the stability and efficiency of the software.
- Developed a Python API to programmatically control BlackMagic Design's DaVinci Resolve video editing software, showcased in a demo that won the NAB Show Product of the Year 2022.
- Successfully redesigned the products's web stack, eliminating unnecessary middleware layers to improve security, eliminate bugs, and enhance DX.

Intern

[Oct 2018 - Nov 2021](#)

- Collaborated with both backend and frontend teams to contribute to the development of new features.
- Conducted thorough testing of new features, ensuring functionality and performance met quality standards before deployment.
- Created a set of email templates for use in the product's notification system, enhancing communication efficiency.
- Sharpened full-stack web development skills through hands-on experience and continuous learning.

Education

BS Computer Science
Kennesaw State University
